Phone: (202) 493-1043

COMDTPUB P16721.35B

COMMANDANT PUBLICATION P16721.35B

Subj: GUIDE FOR ADMINISTRATION OF MERCHANT MARINE DECK  
EXAMINATIONS (DECK GUIDE)

Ref: (a) Code of Federal Regulations Title 46, Parts 10 and 12

1. PURPOSE. This Publication provides guidance for examination room proctors and other personnel who administer examinations to merchant mariner license and document applicants pursuant to the requirements of Reference (a).
2. ACTION. Officers in charge, marine inspection and activity commanders of units with regional examination centers attached shall ensure compliance with the provisions of this Publication.
3. DIRECTIVES AFFECTED. The Guide for Administration of Merchant Marine Deck Examinations (Deck Guide), COMDTPUB P16721.35A, is canceled.
4. MAJOR CHANGES.
  - a. The format has been changed to display, in tabular form, the modules that comprise the recommended professional examination for each license or document applicant.
  - b. Partial exams have been eliminated as a separate category.
  - c. Instructions and Procedures have been combined into a single category labeled Instructions.
  - d. Deck Reference and Examination Material lists have been consolidated, with more detail added to assist the exam room personnel.
  - e. A list of Module Codes has been provided. It shows the module name which should appear on the test booklet cover, the types of applicant for which the module is used, and an explanation of the module number derivation.
  - f. The term Assessment Guidelines has been used in place of Examinations to provide uniformity with the recently published Engineering Guide.

- g. Instructions for administering the Practical Signaling Examination have been included in the Unlimited License section. These replace those issued over Captain Caffrey's signature some years ago.
- h. The practical demonstrations for Able Seaman and Lifeboatman have been modified and a sample Letter of Competency has been provided for both.

5.

ORMS AVAILABILITY. Answer Sheets, CG-5164, Stock Number 7530-01-GF2-8420, unit of description (U/D) 100, unit of issue (U/I) 100 HD, may be obtained from the Engineering Logistics Center (410) 762-6800. Regional Exam Centers are provided an initial supply of this publication. Local reproduction of replacements and sample forms contained herein is authorized.

NON-STANDARD DISTRIBUTION:

<b>CHANGE NUMBER</b>	<b>DATE OF CHANGE</b>	<b>DATE ENTERED</b>	<b>ENTERED BY</b>
CHANGE #1	Jan 2000	Jan 2000	Harvey Bryning

## INTRODUCTION

In its guidance on Evaluation of Competence, the Seafarers Training, Certification, and Watchkeeping Code states, “Scope of knowledge is implicit in the concept of competence. Assessment of competence should, therefore, encompass more than the immediate technical requirements of the job, the skills and tasks to be performed, and should reflect the broader aspects needed to meet the full expectations of competent performance as a ship’s officer. This includes relevant knowledge, theory, principles and cognitive skills which, to varying degrees, underpin all levels of competence.” For reasons such as these the Coast Guard continues to view its written and practical examinations as an essential part of the mariner competency assessment process.

This Publication has been designed primarily for the use of Examination Room Supervisors and other personnel who are actively engaged in overseeing applicants in the exam room. If you have any questions concerning the deck examinations or suggestions for improvements to the Assessment Guidelines or other sections of this manual, please contact:

Examination Administration Branch (NMC-4B)  
U.S. Coast Guard National Maritime Center  
4200 Wilson Boulevard – Suite 510  
Arlington, VA 22203-1804

Title 46 Code of Federal Regulations Part 10 instructs the Officer in Charge of Marine Inspection (OCMI) to conduct a Professional Examination of applicants for original issues, raises in grade, increases in scope, and renewals of licenses. The examination follows a determination by the OCMI that the applicant’s training and experience is satisfactory and they are eligible in all other respects. The purpose of this Publication is to provide:

- An appropriate professional examination for the OCMI’s use, and
- Guidelines for the uniform administration of the examinations.

If we at National Maritime Center may provide further information or assistance with respect to these Assessment Guidelines, please do not hesitate to call on us.

# INSTRUCTIONS

1. Assessment Guidelines (AG). The contents of each exam and the instructions for its administration are detailed in individual Assessment Guidelines (AG). There is an AG for each license/document action for which an examination is required. Each examination is made up of one or more modules (tests). All the modules that might be required for a particular license or document action are shown, however you may not need all modules shown. Further instructions will be provided on the individual AG in those cases. Depending on the rating/license/endorsement for which the applicant is being examined, modules unique to a particular exam may be combined with generic modules, which are common to several exams. Each module is graded independently unless otherwise indicated
2. Exam Room Materials. The latest list of authorized reference material allowed in the exam room begins on Page viii. Review your libraries to ensure that these Publications, and ONLY these Publications, are available to the applicant. Regional Exam Centers (RECs) should keep reference materials current. Other test materials, which may be allowed in the exam room, are listed on Page 13.
3. Time Allowed. When an applicant submits his or her application they should be prepared to be examined on all the material applicable to the license or document for which the application has been made. In order to allow Exam Room Supervisors to manage their time and resources it is recommended that applicants be required to make appointments for all exams. Subject to the Exam Room Supervisor's discretion applicants may start the exam on any day the office is open. Regardless of the day begun, the applicant must take each of the required modules at least once during that calendar week (cannot "wrap" through a weekend). Applicants may take as many modules per day as can be completed within the normal working hours of the examination room. They must complete a minimum of two modules per day, with approximately three and one half-hours allowed for each module. Applicants should be made aware of the normal working hours and cautioned that at closing time, unanswered or unmarked questions will be treated as wrong answers. They should also be made aware that failure to complete the minimum number of modules per day would result in a failing grade being given on the uncompleted module(s).
4. Order Of Testing. Tests should be administered in the order that allows the Exam Room Supervisor to best manage their time and resources. The order in which the modules are administered should never be an optional matter for the examinee to decide. In order to avoid conflict or confusion in a retest situation, applicants should be administered all modules a first time before being administered a retest.
5. Retest Policy. See 46 CFR 10.217 and guidance provided in MSM Volume III Chapter 5.

6. Coordination. When situations arise that require a departure from these instructions please request guidance from National Maritime Center (NMC-4B) in writing (e-mail is acceptable). State the license or document for which application has been made, and what makes the applicant's circumstances different from the norm. NMC will respond in writing to all RECs. In a spirit of fairness and in order to foster good customer relations we should try to ensure that all applicants are treated the same, regardless of where the applicant is being served.
7. Protests. Applicants are to be encouraged to submit Comment-Protest sheets for any question they believe is faulty, i.e. unclear, insufficient data provided, no correct answer or more than one correct answer, etc. Every Comment-Protest Sheet is reviewed for information to improve our exams. If they fail the exam by no more than two questions they may submit a Protest for each incorrect answer. Protests should be faxed to NMC-4B along with their answer key, or keys where two modules are graded together, and any worksheets where applicable. Comments and Protests should be complete, factual, and **show all work**, including math and chart work where appropriate. **A correct answer must be shown**. When sending Protests please note on the cover sheet whether the protest was submitted before or after the answer sheet was scored. If a Protest can be substantiated, the examinee will be given credit for the question and their score adjusted accordingly. A sample Comment-Protest Sheet has been provided as Figure 1.
8. Planning. When planning a Traveling Exam Team (TET) that requires support from NMC-4B, please ensure that you provide plenty of advance notice, preferably in writing (e-mail or fax will do). The POC for Deck Exams would be the Deck Team Leader.
9. Two Modules. Where the AG indicates that two modules are graded together they are to be considered one module for the purposes of pass/fail, user fees, and the number of modules completed per day.
10. Full Exams Required. A full examination is required in all cases in which an applicant wants to change tonnage groups. Tonnage groups are:
  - Not More Than 200 Gross Registered Tons Domestic (500 GT ITC)
  - Not More Than 1,600 Gross Registered Tons Domestic (3,000 GT ITC)
  - Any Gross Tons or Unlimited Tonnage
11. Exam Room Rules. A sample Examination Room Rules has been included as Figure 2.
12. Multiple Ratings. When a candidate requires testing for multiple ratings, the method for assigning modules for the exam should be done in two steps. The first step is assignment of all applicable modules for the highest license. The second step is assignment of the modules for the lesser license(s) not included in the higher. The specific modules are usually Deck General, Deck Safety, Navigation General or a combination of modules that have been designed specifically for that rating and carry the exam code for that rating. Exceptions to this method may be necessary where other variables are involved.

13. Answer Keys. In order to gather statistics on the exam questions we are now scanning the results into a database. To help us in this effort please use an original Merchant Marine Examination Question Selection/Answer Sheet (CG-5164) for each candidate. The forms are available from the Engineering Logistics Center. Copies do not scan well. In order for the scanning system to work the candidate must darken the appropriate spaces for their social security number, module number and test number as well as their choice of answer for each question. Do not accept for grading any CG-5164 that is not filled in completely. Do not make any administrative marks in the answer fields.
14. Exceptions to Examination Requirements. Found in MSM Vol. III, Chapter 5.
15. Local Examinations. Guidance for locally developed examinations, such as Pilotage, can be found in MSM Volume III, Chapter 5.
16. Oral Assisted Examinations. Guidance is provided in MSM Volume III, Chapter 5.
17. Calculators. Applicants may use calculators but not preprinted forms during the examinations. All calculators must meet the following standards:
  - It must not use pre-programmed strips or chips or any other pre-programmed device which may be inserted into the calculator.
  - It may not be a permanently programmed, specialty computer such as a navigation computer. Computers capable of generating trigonometric functions, logs and antilogs, squares, cubes, and the roots thereof are acceptable provided they meet the other requirements.
  - Any manually programmable calculator without simple erasure capability is not permitted.
18. Duties of an Examiner. General guidance regarding the duties of an Exam Room Supervisor is included as Figure 3.
19. Examination Scheduling. In order to accommodate the special circumstances involved, the graduating classes of state and Federal maritime academies may be examined by the cognizant OCMI (REC), at any time after the first semester of the senior year. Examinations for other applicants may be administered only when all regulatory prerequisites are completed. Other applicants should be scheduled in accordance with the guidance provided in preceding paragraphs.
20. Module Administering. Applicants who have successfully completed an exam module as part of the successful completion of a complete examination within the previous twelve months do not require re-examination in the successfully completed module. The same consideration should be given to a course completion certificate that is acceptable in lieu of a required exam. The twelve- month period is determined by the date that the applicant begins testing for the current license or document. If, as part of the current testing, the unlimited applicant fails three or more sections (modules) they must be administered the complete examination in accordance with 46CFR 10.217 (a)(1). An applicant, other than for an unlimited license, who fails to successfully complete all parts of the examination during the current 3-month period must be administered a complete examination in accordance with 46 CFR 10.217(a)(2).

## COMMENT - PROTEST SHEET

\_\_\_\_\_ COMMENT    \_\_\_\_\_ PROTEST    (For Coast Guard use only)

APPLICANT'S NAME: \_\_\_\_\_

MODULE NAME: \_\_\_\_\_

MODULE NUMBER: \_\_\_\_\_ QUESTION NUMBER: \_\_\_\_\_

If you believe there is something wrong with a question that prevents its being answered correctly, i.e., no correct answer or more than one correct answer shown, question is poorly worded, etc, please give all the details below. **Include** your reasons and all **calculations** for math problems such as navigation, stability, or cargo. **Provide** what you believe to be **the correct answer**. If you have failed the module by no more than two questions and your explanations are accepted, your grade could be affected. Even if your comments will not affect your grade, they are considered very valuable and will be used to improve the quality of the questions used on future tests.

SIGNATURE: \_\_\_\_\_ DATE: \_\_\_\_\_

## **RULES OF THE EXAMINATION ROOM**

1. Handbags, briefcases, pagers, cellular phones, books, or notes are not allowed in the Exam Room. Use of personal plotting equipment is encouraged. However, the Examiner can provide these items. Programmable calculators are not allowed in the Exam Room. During the examination you may not refer to any material other than that specifically authorized by the Examiner.
2. Anyone engaged in any cheating or dishonest practices during the exam, including, but not limited to, referring to concealed notes, communicating with or copying work from other applicants, or removing written material from the Exam Room will be dismissed from the exam room and will have failed the entire exam. A re-exam will not be permitted for six months. Those applicants already holding a Merchant Mariner's Document or Coast Guard license may be charged to appear before an Administrative Law Judge where their license may be suspended or revoked or other penalties assessed.
3. Applicants should complete a module before leaving the exam room. Head (restroom) calls are not normally permitted. Upon completion of your examination, return all reference Publications to their proper location in the exam room. Place your answer sheet and scratch paper inside of the front cover of the examination booklet and give the items to the Examiner.
4. Eating and drinking are not permitted in the exam room.
5. The normal work hours for this center are \_\_\_\_\_ to \_\_\_\_\_. You must complete at least two modules per day. At closing time unanswered or unmarked questions will be treated as wrong answers. Failure to complete two modules per day will result in a failing grade being assessed on the uncompleted module(s).
6. Do not write or mark in the test booklets or any reference material. If you notice any marks in the exam book or any reference material, please notify the Examiner.
7. If you feel a question is faulty, unclear, or has no correct answer indicated, choose the most correct answer, mark the answer sheet accordingly, and complete a COMMENT - PROTEST SHEET provided by the Examiner. Explain as clearly as possible the specific concern or objection to the question. If you feel there is a more correct answer that is not included in the choices **show** how you arrived at your answer including all **computations** for navigation and other mathematical problems. **A correct answer must be shown.**
8. The Examiner is always available to assist you. However, the Examiner cannot discuss question content with you. See item 7.

**I HAVE READ AND UNDERSTAND THE ABOVE RULES.**

**I ALSO UNDERSTAND THAT I MUST COMPLETE THE ENTIRE EXAM CYCLE,  
INCLUDING RETESTS IF ANY, WITHIN 90 DAYS OF THE FIRST EXAM.**

**SIGNATURE:** \_\_\_\_\_ **DATE:** \_\_\_\_\_

**Figure 2: Exam Room Rules**

# **DUTIES OF AN EXAMINER**

## **TYPICAL EXAMINATION PROCESSES**

The examiner reviews the file of an applicant after the applicant has been approved to test for a license or endorsement. He/she reviews the file to determine the correct examination/examinations to administer. At the appropriate time, the examiner selects the modules from the computer database and downloads them in preparation for the applicant's examination.

On the appointed morning after the appropriate exam fees are paid, the examiner identifies the applicant, reviews with the applicant the test procedures, reference material that may be available, and the operating procedures and rules of conduct during the exam. The applicant is given the initial modules, the answer sheet and instructions specific to the particular test module. After the applicant completes the module and submits the answer sheet, the examiner performs an initial review to ensure that it is completed correctly. The applicant may then be given another test module if time permits and the applicant desires, or further testing may be deferred until the afternoon session. The answer sheet is scored, the applicant informed of the results, and the results entered on the appropriate records. If the applicant has failed the module by no more than two questions, the examiner will allow a review of the module and submission of a protest if the applicant desires. If a protest is submitted, the examiner faxes it to the National Maritime Center for review. Upon receipt of the results of the review, the applicant is advised. These procedures continue until the applicant has completed all modules that are part of the examination.

During the actual testing, the examiner oversees the exam room to preclude cheating, answers procedural questions, and provides information if the applicant desires to comment on a question. If cheating is detected, the examiner takes steps to bar the applicant from further testing for six months. At the end of the workday, the examiner accounts for all modules used; shreds used modules, scrap paper, and used charts; and prepares for the next day of testing.

After the final module and the applicant has passed the examination, the examiner reviews the applicant's file to ensure that all entries have been made and forwards to the file to the issuance section. The applicant is advised of the next steps in the issuance process. If the applicant failed the examination, he or she is advised of the next steps in the testing process and another examination date is scheduled if the applicant remains eligible

## **GENERAL DUTIES NOT INCLUDED ABOVE**

- a. Administer practical tests in knot tying, or launching a lifeboat when these tests are required and the exam room is equipped to administer tests. If not equipped, the examiner advises the applicant of the methods whereby competency can be proved. Seek competent assistance when required.
- b. Reviews reference material to ensure that sufficient copies are available, that they are in satisfactory condition, that extraneous markings are removed, and that the material is stowed in an orderly fashion. When necessary, orders new reference material for addition to the library and purges outdated material.
- c. Ensures that consumables are adequate. Orders extra consumables when necessary.
- d. Checks examination room after closing for evidence of cheating and takes appropriate action to detect the cheat if evidence is found.
- e. Ensures that furniture in the exam room is adequate for intended use and in good, safe condition. If not, takes appropriate action to remedy.
- f. Maintains a daily log of the persons tested.
- g. Ensures that modules and completed answer sheets are stowed with adequate security.

**Figure 3: Duties of an Examiner**

## MATERIALS ALLOWED IN THE EXAM ROOM

The following charts and miscellaneous materials are required/allowed in the examination room for use by the Deck license applicant with all except the Rules of the Road module:

Calculator – See Instructions for rules concerning calculator use.  
Plotting Tools – i.e., Dividers, Triangles, Nautical Slide Rule

## COMMONLY USED ABBREVIATIONS

<b><u>Abbreviation</u></b>	<b><u>Represents</u></b>
2/M	Second Mate
3/M	Third Mate
AB	Able Seaman
C/M	Chief Mate
COLREGS	International Rules of the Road
FIV	Fishing Industry Vessel
GL	Great Lakes
GL & I	Great Lakes and Inland
GRT	Gross Registered Tonnage
GT	Gross Tons (ITC Tonnage)
INL	Inland
ITC	International Convention Tonnage
LB	Lifeboatman
M	Master
MODU	Mobile Offshore Drilling Unit
MT	Mate
NC	Near Coastal
NMT	Not More Than
O	Oceans
OI	Original Issue
OIM	Offshore Installation Manager
OSV	Offshore Supply Vessel
OUPV	Operator Uninspected Passenger Vessel
OUTV	Operator Uninspected Towing Vessel
RIG	Raise in Grade
ROR	Rules of the Road
ROTWR	Rivers Other Than Western Riv.
WR	Western Rivers

**This page was intentionally left blank**

## MODULE CODES

A Module Code is a five digit group that describes either the subject area (usually has a zero as a first digit) or license level involved (preceded by two (2) digits indicating the license code). For example 05XXX or 06XXX would indicate Rules of the Road, 07XXX would indicate a generic navigation module. Deck modules that begin with 1 relate to unlimited licenses, those with 2 or 3 limited licenses, 4 unlicensed ratings, and 9 are MODUs. Modules that begin with 5 through 8 are engineering modules. The third digit is used to denote various things, for instance to identify a geographic area (7 = Great Lakes) or special purpose, i.e., 9 indicates a Renewal Exercise. The fourth (4) digit had no particular significance in the past but is now being used to indicate the year in which the module is generated, i.e., 07381 would be a module created in 1998. The fourth (4) and fifth (5) digits are read together as the version number. In the case of 25081 or 27002, 81 and 2 are the respective version numbers. Different versions of the test are used to place a different emphasis on the various subject matter areas included in a typical module. Use of the different versions at random is encouraged, except in the case of the navigation problems for Chief Mate and Third Mate, unlimited tonnage, where the fifth (5) digits must be compatible (odd or even). For example 13502 and 13604 are compatible, 13502 and 13603 are not.

MODULE NUMBER	MODULE NAME	MODULE USE
011X1	Deck & Navigation General + Deck Safety	2M or CM to Master NMT 1600 GRT
011X2	“T-Boat” Regulations	OUPV to Mate NMT 100 GRT
011X3	Deck General + Deck Safety	NMT 100 GRT to NMT 200 GRT, O & NC
011X4	Deck General + Deck Safety	NMT 100 GRT to NMT 200 GRT, I
017XX	Deck General	Assistance Towing Endorsement
018XX	Deck Safety + Rules of the Road	Sail Endorsement
031XX	Deck & Navigation General + Deck Safety	First Class Pilot
032XX	Navigation General	First Class Pilot
039XX	Renewal Refresher Exercise	First Class Pilot
054XX	Rules of the Road	International + Inland – Upper Level Licenses
059XX	Rules of the Road	International + Inland Renewals
065XX	Rules of the Road	International + Inland – Lower Level Licenses
066XX	Rules of the Road	Inland Rules Only
069XX	Rules of the Road	Inland Rules Only – Renewals
072X1	Navigation General	NMT 1600 GRT, Any Waters
072X3	Navigation General	Rivers Other than Western Rivers
072X4	Navigation General	Western Rivers
073XX	Navigation General + Chart Navigation	Over 100 GRT and UFIV, OUTV, First Class Pilot

<b>MODULE NUMBER</b>	<b>MODULE NAME</b>	<b>MODULE USE</b>

132XX – Navigation General	70	70	
133XX – Deck Safety	70	70	
135XX – Navigation Problems – Part A (1)	16	90	

Notes:

- (1) Module 135XX has only 16 questions. Applicants may miss two questions and receive a passing grade.
- (2) Applicants must also pass a practical signaling examination (flashing light) in accordance with 46 CFR 10.401(h).

ASSESSMENT GUIDELINE NO. 1 – 19	License Type: License Group: License Action: License Condition:	<b>THIRD MATE</b> <b>ANY GROSS REGISTERED TONS</b> <b>INCREASE IN SCOPE</b> <b>TO – OCEANS</b>	EXAM CODE 13BI
<b>NUMBER OF MODULES:</b> One (1)	<b>NUMBER OF QUESTIONS</b>	<b>MINIMUM SCORE</b>	<b>SUBJECT MATTER COVERED IN APPROVED COURSES</b>
136XX – Navigation Problems – Part B (1)	9	90	

Notes:

- (1) Applicant may miss one (1) question and receive a passing grade.

ASSESSMENT GUIDELINE NO. 1 – 20	License Type: License Group: License Action: License Condition:	<b>THIRD MATE</b> <b>ANY GROSS REGISTERED TONS</b> <b>RENEWAL</b> <b>OCEANS/NEAR COASTAL</b>	EXAM CODE 13RE
<b>NUMBER OF MODULES:</b> Two (2)	<b>NUMBER OF QUESTIONS</b>	<b>MINIMUM SCORE</b>	<b>SUBJECT MATTER COVERED IN APPROVED COURSE</b>
059XX – Rules of the Road (1)(3)	30	90	
129XX – Renewal Exercise (2)(3)	50	90	

Notes:

- (1) Applicants for deck license renewal who complete an open book exercise in accordance with 46 CFR 10.209 must also complete an open book Rules of the Road exercise.
- (2) Applicants for renewal of licenses may complete an open book exercise in accordance with 46 CFR 10.209. The exercise may be mailed to the applicants or completed by the applicant at the REC where they have access to the exam room reference materials.
- (3) Applicants who fail to achieve the minimum passing score upon initial testing should be retested in accordance with the rules set forth in 46 CFR 10.217, i.e. two (2) retests allowed within a 3 month exam cycle/retest period.

ASSESSMENT GUIDELINE NO. 1-21	<b>PRACTICAL SIGNALING DEMONSTRATION</b>	
-------------------------------------	--	--

1. **Required.** Applicants for licenses authorizing service on ocean going and near coastal vessels of more than 1,600 gross registered tons are required to pass a practical signaling examination in accordance with 46 CFR 10.401. A similar practical demonstration is required for certification as an officer in charge of a navigation watch on ships of more than 200 gross registered tons (500 gross tons ITC) under STCW Code Table A-II/1.
2. **Administration.** Administer this examination in accordance with the procedures set forth in 46 CFR 10.217.
3. **Equipment malfunction.** If any tape or equipment malfunctions should be noted during the administration of the exam contact NMC 4B for assistance. Replacement tapes can be provided.
4. **Equipment adjustment.** Experience has shown that adjustment of the volume control on the tape recorder can have a definite effect upon the quality of the coded signals. The best setting for the volume control should be determined prior to the exam and this setting used at all times during the exam to insure steady and uninterrupted transmission.
5. **Compromise.** Taped flashing light exams can be compromised. To minimize the effects:
  - a. Use all 30 taped tests at random. Avoid setting up to start with the same exam as a routine practice. Avoid repeating exams for the same applicant as a routine practice.
  - b. Avoid revealing the number of the test to be used. Set up the flashing light unit prior to the administration of the exam so that the tape has just passed the point where the number of the test is given, and then switch the device to the LIGHT position. By leaving the device in the LIGHT position after this point, the applicant will see only the light signals, when the tape is restarted.
6. **Scoring.** The text of the five-letter group message and the correct copying and decoding of a message using the International Code of Signals are graded to score the exam.
  - a. The text of each five-letter group message consists of five random five-letter groups for a total of 25 characters. Three points are given for each correct character for a possible total of 75 points.
  - b. The code group message consists of five coded groups that must be copied and decoded. Each correctly decoded group is worth five points for a total of 25 points.
  - c. Minimum acceptable score is 80.
  - d. Time allowed to demonstrate this proficiency is regulated by the preset transmission speed.
7. **Equipment.** The flashing light test equipment consists of the following:
  - a. One (01) Califone cassette tape recorder
  - b. One (01) flashing light box assembly
  - c. Two (02) C-90 cassette tapes with 15 examinations recorded on each tape

8. **Operating Instructions.** Operating instructions are given in the Instruction Manual.
9. **Test Format.** Shown on following figure. Each examination consists of 2 sections which must be copied for score; a RANDOM FIVE- LETTER GROUP section and an H.O. 102 CODE GROUP section. Spoken instructions are not recorded with the taped examinations.
  - a. The RANDOM FIVE (5) LETTER GROUP section consists of:
    - (1) Identity: DE followed by a four- (4) letter identity signal, sent once.
    - (2) Text: Five (5) random, five (5) letter groups, each of which is repeated twice.
    - (3) Ending: The signal AR indicates the end of the five- (5) letter groups.
  - b. The H. O. 102 CODE GROUP consists of:
    - (1) Identity: DE followed by a four- (4) letter identity signal, sent once.
    - (2) Code Indicator: YU: Indicates that a Code Group follows. Sent only once.
    - (3) Text: Five (5) code groups, each of which is repeated twice.
    - (4) Ending: The signal AR which indicates the end of the five- (5) letter groups.
10. **Test Procedure.** It is recommended that each Examiner become familiar with the equipment and the format used for each examination. Each examination should begin with complete instructions to the applicant. To ensure that each applicant understands the instructions copies of a sample message similar to the one that follows should be distributed. Any questions that arise should be answered completely prior to beginning the examination. Examiners are encouraged to allow applicants to take one or more complete tests, as time allows, for practice before actually copying for score.

Each exam has been recorded at the minimum required rate. Since each group is repeated twice, further allowances to an individual applicant or group of applicants will defeat the purpose of standardizing the exam for all applicants. All exams are recorded in the following format.

## TEST MESSAGE FORMAT

<u>MACHINE IN THE AUDIO SETTING</u>	
Voice	SIGNALING EXAMINATION NUMBER 1 (2, 3, etc)
Five (5) second interval	
Voice	THE EXAMINATION WILL CONSIST A SAMPLE MESSAGE, FOLLOWED BY TWO SECTIONS WHICH WILL BE SCORED
Three (3) second interval	
Voice	A STEADY LIGHT WILL INDICATE WHEN A TESTING SECTION HAS ENDED AND THAT THE CODE FLASHER MUST BE SHIFTED TO THE AUDIO POSITION. STUDENTS MUST NOTIFY THE INSTRUCTOR WHEN THIS OCCURS.
Three (3) second interval	
Voice	A SAMPLE MESSAGE WILL BE SENT IN PLAIN LANGUAGE, EACH MESSAGE WILL BE SENT TWICE.
Three (3) second interval	
Voice	I REPEAT, A SAMPLE MESSAGE WILL BE SENT IN PLAIN LANGUAGE, EACH MESSAGE WILL BE SENT TWICE.
Five (5) second interval	
Voice	PLACE SWITCH IN THE LIGHT POSITION AT THIS TIME TO COMMENCE THE SAMPLE MESSAGE
Five (5) second interval (Switch setting to LIGHT)	
<u>MACHINE IN LIGHT SETTING</u>	
Light	DE KIWI WHAT SHIP WHAT SHIP AR
Light	Cue. Five (5) second steady light (Switch setting to AUDIO)
Three (3) second interval	
<u>MACHINE IN AUDIO SETTING</u>	
Voice	PART ONE OF THE SCORED SIGNALING EXAMINATION CONSISTS OF A RANDOM FIVE- (5) LETTER GROUP MESSAGE. EACH OF THE FIVE (5) GROUPS WILL BE SENT TWICE
Three (3) second interval	
Voice	I REPEAT, THE FOLLOWING MESSAGE CONSISTS OF FIVE (5) RANDOM FIVE (5)- LETTER GROUPS, EACH SENT TWICE.
Five (5) second interval

054XX – Rules of the Road	50	90	
073XX – Navigation General + Chart Navigation (3)	20	90	

Notes:

- (1) Individual REC’s must develop and administer a Local Knowledge Module to adequately examine the candidate. This will include, but is not limited to, local information questions and a Chart Sketch. RECs shall establish the passing grade for their locally prepared examination material.
- (2) This exam is for application for an original license as first class pilot and for an endorsement as first class pilot authorizing service on vessels of not more than 1600 gross registered tons. Applicants for extensions of route and for endorsement as first class pilot on licenses authority service on vessels o more than 1600 GRT are only required to successfully complete a local knowledge module and chart sketch for the specific route for which endorsement is sought. (46 CFR 10.707).
- (3) Module 073XX does not apply to all routes and may be omitted at the discretion of the OCMI, particularly for routes covering well-defined, limited waterways where vessels do not navigate on the traditional sense. Module 074XX (10 questions, minimum score 90) may be used for routes on River Other Than Western Rivers. Module 075XX (10 questions, minimum score 90) may be used for routes on Western Rivers.
- (4) Modules 031XX and 032XX were designed for use with examinations for licenses/endorsements for service on vessels of more than 1,600 GRT in accordance with 46 CFR 10.701 and 15.812. Certain questions may not be applicable in all circumstances. These modules may be modified by deleting inapplicable questions and adjusting the scoring basis.

472XX – Deck General & Safety + Rules of the Road	(1)	50		

- Notes:
- (1) Modules 471XX and 472XX are graded together for a total of 100 questions.
  - (2) Applicants must also complete the practical demonstration found following AG 4-8.
  - (3) Applicants who do not have a Lifeboatman MODU endorsement on their merchant mariner document complete the Lifeboatman MODU AG 4-11.

ASSESSMENT GUIDELINE NO. 4 – 8		License Type: License Group: License Action: License Condition:	<b>ABLE SEAMAN</b> <b>MOBILE OFFSHORE DRILLING UNIT</b> <b>RENEWAL</b> <b>ANY WATERS</b>	EXAM CODE 47RE
<b>NUMBER OF MODULES:</b> One (1)		<b>NUMBER OF QUESTIONS</b>	<b>MINIMUM SCORE</b>	<b>SUBJECT MATTER COVERED IN APPROVED COURSES</b>
479XX – Renewal Exercise	(1)(2)	30	90	

- Notes:
- (1) Applicants for renewal of merchant mariner documents may complete an open book exercise in accordance with 46 CFR 12.02-27. The exercise may be mailed to the applicants or completed by the applicant at the REC where they have access to the exam room reference materials.
  - (2) Applicants who fail to achieve the minimum passing score upon initial testing should be retested in accordance with 46 CFR 10.217(a)(2).

ASSESSMENT GUIDELINE NO. 4 - 9	<b>ABLE SEAMAN PRACTICAL DEMONSTRATION</b>	
--------------------------------------	--	--

46 CFR 12.05-9 (c) requires applicants for certification as Able Seaman to demonstrate knowledge of the principal knots, bends, splices, and hitches in common use by actually making them. The procedures to be followed and other guidance regarding the demonstration are provided below.

1. **REC responsibilities.** The REC/MU should supply the required materials. Line used for splicing may not be reusable. Line used for knot tying is reusable. For applicants desiring to perform the demonstration at the REC it is suggested you enlist the assistance of a knowledgeable active duty or reserve BM or QM to observe the demonstration. As an alternative you may accept a Letter of Competency similar to that shown on the following page.
2. **Procedures to be followed:**
  - (a) Applicant's must satisfactorily complete one (1) splice with strands whipped. This may be either an eye splice or a short splice. Time allowed 15 minutes.
  - (b) After completing the splice, the examiner will select ten knots/hitches from the following list. **Those marked with an asterisk must be included in the selection.** The applicants must tie seven (7) of the knots/hitches correctly to successfully demonstrate proficiency. Time allowed 15 minutes

*BOWLINE	RUNNING BOWLINE
*SQUARE KNOT	BOWLINE ON A BIGHT
*CLOVE HITCH	FISHERMAN'S BEND
*SHEET BEND	TIMBER HITCH
CARRICK BEND	CATSPAW
ROLLING HITCH	FIGURE EIGHT
STOPPER HITCH	BARREL HITCH
FRENCH BOWLINE	ROUND TURN AND TWO HALF HITCHES
STAGE HITCH	DOUBLE BECKET

**ABLE SEAMAN PRACTICAL – LETTER OF COMPETENCY**

**To: Person Observing the Demonstration**

1. Your assistance in administering the practical portion of the Able Seaman examination required under 46 CFR 12.05-9(c) is appreciated. Certification of the bearer’s ability to perform the tasks listed on the reverse page will enable the issuance of their Able Seaman’s certification.
2. The demonstration of ability shall be witnessed by a designated examiner as part of an approved or accepted training course, a vessel Master or other officer licensed for service on vessels of over 200 gross registered tons, an appropriately trained Coast Guard commissioned (1) or non-commissioned (1) officer, or a responsible person authorized in writing by the Officer in Charge Marine Inspection.

**To: Officer in Charge Marine Inspection (Regional Examination Center)**

**Subj: CERTIFICATION OF PERFORMANCE OF PRACTICAL ABILITY**

This is to certify that I observed a successful demonstration of the applicant's proficiency, as indicated on the reverse, of the principal knots, bends, splices and hitches in common use by:

ASSESSMENT GUIDELINE NO. 4 – 13	License Type: License Group: License Action: License Condition:	<b>LIFEBOATMAN</b> <b>MOBILE OFFSHORE DRILLING UNIT</b> <b>RENEWAL</b> <b>ANY WATERS</b>	EXAM CODE 49RE
<b>NUMBER OF MODULES:</b> One (1)	<b>NUMBER OF QUESTIONS</b>	<b>MINIMUM SCORE</b>	<b>SUBJECT MATTER COVERED IN APPROVED COURSES</b>
499XX – Renewal Exercise (1)(2)	20	90	

Notes:

- (1) Applicants for renewal of merchant mariner documents may complete an open book exercise in accordance with 46 CFR 12.02-27. The exercise may be mailed to the applicants or completed by the applicant at the REC where they have access to the exam room reference materials.
- (4) Applicants who fail to achieve the minimum passing score upon initial testing should be retested in accordance with the rules set forth in 46 CFR 10.217(a)(2).

ASSESSMENT GUIDELINE NO. 4 – 14	<b>LIFEBOATMAN PRACTICAL DEMONSTRATION</b>	
---------------------------------------	--	--

**46 CFR 12.10-5(a) requires applicants for certificates or endorsement as lifeboatman to demonstrate their ability to carry out effectively all the duties that may be required of a lifeboatman. They must demonstrate that they have been trained in all operations connected with the launching of lifeboats, lifecrafts, and other survival craft; that they can understand and carry out the usual orders given, in English, incident to launching and recovery of survival craft; that they are acquainted with the practical handling of boats and the use of oars; and that they are capable of taking command of the crew of a lifeboat or other survival craft.**

1. **REC responsibilities.** For applicants desiring to perform the demonstration at the REC it is suggested you enlist the assistance of a knowledgeable active duty or reserve BM or QM to observe the demonstration. As an alternative you may accept a letter of competency similar to the one shown on the following page. Applicants may use the previously supplied one-quarter scale models to describe or identify components and procedural steps involved in lifeboat launching and recovery. However, it is preferable to use actual equipment to demonstrate these proficiencies. The services of a boat and crew are required in Part III to demonstrate ability to handle a boat and command a crew underway. These services are not available at all RECs.
  
2. **Procedures to be followed:**
  - (a) **PART I – OAR COMMANDS.** In the course of acting as person in charge of a boat underway applicant must have the crew perform each of the indicated maneuvers, using the commands shown. Time allowed 30 minutes. Applicant must complete all steps without coaching to satisfactorily demonstrate proficiency.
  
  - (b) **PART II – COMPONENT IDENTIFICATION.** Applicants must identify the equipment used in lifeboats and other survival craft. Ideally this will be done using the actual equipment. They should describe under what circumstances and in which craft the equipment would be found, the method in which it is used, and any special precautions regarding its construction or use. Award 1 point for identification and 1 point for description. Time allowed 30 minutes. Applicant must accumulate a minimum of 70 points to demonstrate proficiency.
  
  - (c) **PART III - PROCEDURES.** The applicant must perform or describe in detail the procedural steps involved in the launching and recovery of lifeboats, and the launching details for liferafts. The steps are shown in Column A on the checklist which follows. Where the applicant performs the demonstration on other than gravity davits, have them describe the procedures used with gravity davits. If the applicant correctly performs or describes more than 40 of the steps in Column A, the examiner asks the applicant the question shown alongside the missed steps. The examiner indicates on the forms the correctly described steps and answered questions. The total of correct indications in Columns A and B is the final score. Maximum points available are 85. Time allowed is 60 minutes.
  
  - (d) **MINIMUM SCORE.** The minimum acceptable score for the entire demonstration is 70 points. **To have successfully demonstrated this competency the applicant must correctly perform or describe all the steps in Part I, earn a minimum of 70 points in Part II and Part III, and perform or describe at least 40 of the steps from Column A in Part III.**

## **LIFEBOATMAN PRACTICAL – LETTER OF COMPETENCY**

**To: Person Observing the Lifeboatman Practical Demonstration**

1. Your assistance in administering the practical portion of the Lifeboatman examination and demonstration required under 46 CFR 12.10-5 is appreciated. Certification of the bearer's ability to perform the tasks as described on the reverse, and in the accompanying lists, will enable the issuance of their Lifeboatman endorsement.
2. The demonstrations of ability shall be witnessed by a designated examiner as part of a Coast Guard approved or accepted training course; a vessel's Master or other ship's officer, licensed for service on vessels of over 200 gross registered tons; an appropriately trained Coast Guard commissioned or non-commissioned officer; or a responsible person authorized in writing by the Officer in Charge Marine Inspection.

**To: Officer in Charge Marine Inspection (Regional Examination Center)**

**Subj: CERTIFICATION OF DEMONSTRATION OF PROFICIENCY**

1. This is to certify that the applicant named below has satisfactorily completed a practical demonstration of proficiency in the following :
  - (a) Practical handling of lifeboats, rescue craft, liferafts, and other survival craft including the use of oars and other means of propulsion, and operation of other equipment installed in the craft.
  - (b) Operations connected with the launching and recovery of lifeboats and rescue craft, and the launching of liferafts and other survival craft, including the carrying out of the usual orders given, in English.
  - (c) Ability to take command of a survival craft.

Figure 4.2: Sample Lifeboatman Practical-Letter of Competency

**LIFEBOATMAN  
PRACTICAL DEMONSTRATION**

**PART I – OAR COMMANDS**

Ref: American Merchant Seaman’s Manual

<u>COMMAND</u>	<u>MEANING</u>	<u>DEMONSTRATED CORRECTLY</u>
<b>STAND BY THE OARS</b>	Each crewmember clears oar, ships rowlock, places blade flat, on gunwale forward, inboard of person in front of them.	
<b>SHOVE OFF</b>	Inboard bowman pushes off using boathook. When ordered bowman releases sea painter.	
<b>OUT OARS</b>	Place oars in rowlocks directly from the boated position or from “Stand By The Oars” position. Oars horizontal, at right angles to keel, blades flat.	
<b>GIVE WAY TOGETHER</b>	Blades of oars are swung forward and dipped into the water. At the command, “Together”, the stroke is started. At the end of the stroke, blades are feathered, swung forward, and another stroke is started.	
<b>HOLD WATER</b>	Complete the stroke, stop rowing, drop blade into water vertically, and gradually swing to a position at right angles to the keel, taking care not to overstress rowlock.	
<b>PORT (STARBOARD) HOLD WATER</b>	Used to turn boat more quickly. Ordered side completes stroke and holds water, other side continues to row. With boat stopped can be used with “Give Way” command to opposite side to turn boat while gathering minimal headway.	
<b>STERN ALL</b>	When rowing ahead, complete the stroke, and then commence to backwater, gradually increasing the depth of the blades.	
<b>BACK WATER</b>	Row in the astern direction	
<b>OARS</b>	Complete the stroke, stop rowing, and bring the oars horizontal, at right angles to the keel, with the blades held flat.	
<b>TRAIL OARS</b>	Complete stroke and carefully allow oar to trail alongside, fore and aft.	
<b>BANK OARS</b>	Given from the “Oars” position. Allows oarsmen to rest when laying to. Oars drawn through the rowlock and rested on opposite gunwale	
<b>IN BOWS</b>	The bowmen complete the stroke, swing their oars forward, and boat them. They then stand by with boat hooks to fend off or receive a line.	
<b>WAY ENOUGH</b>	Given when approaching a landing. Complete stroke, toss oars to about 45 degrees and boat the oars, forward oars first, unship the rowlocks	
<b>BOAT THE OARS</b>	From “Oars” or “Toss Oars”, place the oars in the boat on side thwart, blades forward.	

**LIFEBOATMAN  
PRACTICAL DEMONSTRATION**

**PART II – COMPONENT  
IDENTIFICATION**

Reference: 46 CFR 199.175

<u>COMPONENT</u>	<u>POINTS</u>	<u>COMPONENT</u>	<u>POINTS</u>
Bailer		Provisions	
Bilge pump		Pump	
Boathook		Radar reflector	
Bucket		Rainwater collection device	
Can Opener		Repair kit	
Compass		Sea anchor	
Dipper		Searchlight	
Drinking Cup		Seasickness kit	
Fire extinguisher		Signal, smoke	
First aid kit		Signal, hand flare	
Flashlight		Signal, parachute flare	
Hatchet		Skates and fenders	
Heaving Line		Sponge	
Instruction card		Survival instructions	
Jackknife		Table of lifesaving signals	
Knife (non-folding)		Thermal protective aids	
Ladder		Tool kit	
Mirror, signaling		Towline	
Oars/Paddles		Water	
Painters		Whistle	

<b>LIFEBOATMAN PRACTICAL DEMONSTRATION</b>	<b>PART III - PROCEDURES</b>
--	------------------------------

**Applicants shall demonstrate their ability to prepare and safely launch survival craft and clear the ship's side quickly; give the correct commands for launching and boarding survival craft, clear the ship and handling and disembarking persons from survival craft.**

<b>LIFEBOAT LAUNCH PROCEDURES</b>			
<b>Applicant performs or describes in detail the steps involved in lowering and launching of a lifeboat from gravity type davits (see note regarding demonstrations on other types).</b>	<b>A</b>	<b>Questions to assist the Examiner in assessing the applicant's competence when they have failed to include an item in Column A.</b>	<b>B</b>
Muster the crew.		How do you know everyone assigned is present?	
Ensure that each crewmember knows their duties.		How do you know the crew is trained? Where are the duties of the crew listed?	
Ensure crew and passengers are protectively dressed.		How should persons who are preparing to abandon ship be dressed?	
Ensure crew and passengers have properly donned lifejackets and immersion suits.		Where are immersion suits not required? (32N to 32S)	
Ensure lifejackets and immersion suits have proper equipment in good working order		What should be attached to a lifejackets and immersion suits to attract attention?	
Ensure boat properly suspended from falls.		How should boats be suspended to perform maintenance on them, the winch or falls?	
Ensure gripes in place and secure.		What secures the boat in its cradle?	
Remove lifeboat stowage cover and strongback. Stow clear of launch and debarkation area.		What protects the interior of a stowed lifeboat?	
Ensure tricing pendants properly rigged and secure		How should the trip lines on the McCluney hooks be led?.	
Ensure Rottmer release gear handle pinned in closed position and has clear path to open.		What prevents accidental release of the lifeboat from the falls?	
Ensure boat drain cap in place and secure		How is water prevented from entering the boat through its drain?	
Ensure that davit tracks are clear		What should be checked prior to lowering to prevent the davit arm wheels from jamming?	

## LIFEBOAT LAUNCH PROCEDURES

<b>Applicant performs or describes in detail the steps involved in lowering and launching of a lifeboat from gravity type davits (see note regarding demonstrations on other types).</b>	<b>A</b>	<b>Questions to assist the Examiner in assessing the applicant's competence when they have failed to include an item in Column A.</b>	<b>B</b>
Release manropes (lifelines) and ensure they will run free as boat lowers		What is provided to protect the occupants in case the boat was to fall unexpectedly?	
Ship rudder and/or tiller.		What is a sweep oar?	
Have sea painter led out, made fast forward as close to water as possible, with all slack removed.		How do you ensure the waterborne boat will lay alongside at the embarkation station?	
Ensure painter properly led inboard of forward falls, outboard of everything else.		What could cause the sea painter to foul during the launch process?	
Ensure sea painter is properly made fast to forward inboard thwart.		Where is the sea painter made fast in the boat?	
Ensure toggle pin has a clear release path and releases into boat.		How do you ensure a "clean" release of the sea painter when so ordered?	
Ensure everyone is out of boat.		How do you prevent injury to occupants while lowering the boat to the embarkation deck?	
Have gripes released, removed, and stowed clear of launch and embarkation areas.		What happens to the gripes after they are released?	
Ensure locking bar swung clear of track.		What fitting or part locks the boat in the stowed position?	
Have embarkation ladder made ready for use. Remove cover. Ensure made fast to deck.		How will the winch operator get off the ship?	
Ensure no personnel or other obstruction in lowering path.		What should be checked prior to lowering to prevent damage to the boat or injury to people on deck?	
Have lifeboat lowered at a steady speed to the embarkation deck.		What speed should be used when lowering the lifeboat?	
Ensure strain on tricing pendants just enough to hold boat securely alongside at embark deck.		What happens if you continue to try to lower the boat past the embarkation deck?	
Have frapping lines passed.		What helps to prevent occupants from being thrown from the boat when the tricing pendants are released?	
Order crew and passengers into the boat.		How should load be distributed in boat?	

## LIFEBOAT LAUNCH PROCEDURES

<b>Applicant performs or describes in detail the steps involved in lowering and launching of a lifeboat from gravity type davits (see note regarding demonstrations on other types).</b>	<b>A</b>	<b>Questions to assist the Examiner in assessing the applicant's competence when they have failed to include an item in Column A.</b>	<b>B</b>
Order everyone to be seated, using manropes.		What should occupants do while the boat is being lowered?	
Have tricing pendants released.		What happens if you continue to lower the boat below the embarkation deck?	
Have frapping lines eased out slightly.		What keeps the boat from swinging while being lowered?	
Order boat lowered.		What speed should be used in lowering the boat?	
When safely waterborne order boat released.		Ideally, when should boat be released? (crest of wave or swell)	
Order engine started or oars deployed.		What should be checked immediately after starting engine? (cooling water flow) What is Fleming gear?	
Shove off.		How do you get the boat heading away from the ship's side? (use boathook not hands)	
Swing clear of ship.		If vessel has way on what helps boat sheer away from ship?	
Release sea painter.		What should you do once the boat has swung clear of the ship's side?	
Look for, and assist, survivors.		What should you look for once safely clear of ship?	
Join other boats.		What helps aircraft sight vessel survivors?	

## LIFEBOAT RECOVERY PROCEDURES

Applicant performs or describes in detail the steps involved in the recovery of a lifeboat from gravity type davits (see note regarding demonstration on other types)	A	Questions to assist the Examiner in assessing the applicant's competence when they have failed to include an item in Column "A"	B
Request and receive permission to come alongside.		How do you communicate with the ship from a lifeboat? What is signal to recover boat?	
Inspect Rottmer release gear for free rotation.		When do you close and lock Rottmer gear?	
Come alongside slightly forward of falls.		To what position should you aim during your approach to the ship?	
Retrieve and secure sea painter to thwart.		How is the boat secured to the ship?	
Maneuver into position under the davit heads.		Where does the sea painter position the boat?	
Have the frapping lines eased out.		What keeps the falls clear as boat maneuvers into position alongside	
Have hooks engaged.		How are hooks lowered?	
Have releasing gear secured.		What prevents accidental release of hooks?	
Have boat raised to just short of davit head.		How high is boat raised? Why?	
Have tricing pendants rigged.		What prevents a Pelican hook from opening accidentally?	
Have boat lowered to embarkation deck.		How is boat brought alongside at embarkation deck?	
Order occupants to disembark.		How could occupants disembark from boat prior to raising?	
Have cap removed from drain. Have automatic drain ball checked for free flow of water.		How do remove standing water from boat?	
Stow frapping lines.		What do you do with the frapping lines?	
Have tracks and travel path checked for obstructions.		What should be done prior to raising boat to prevent jamming while raising	
Have boat raised.		At what speed should the boat be raised?	
Have limit switch operation checked.		What automatic device prevents the boat from being raised too far?	
Have boat raised until about 12 inches short of the mechanical stops or stowed position.		Where are the inboard ends of gripes secured?	
Secure power to the winch.		When should power to the winch be secured?	
Hand crank winch to mechanical stops.		What safety feature prevents injury if power down activated while hand raising the boat?	
Connect and tighten gripes and locking bar.		What prevents a secured boat from lowering?	
Lower boat until it rests on keel.		Does a fully raised boat rest on its keel?	
Have all gear properly stowed in boat.		What should be done with the boat's gear?	

## LIFERAFT LAUNCH PROCEDURES

Applicant performs or describes in detail the steps involved in launching and boarding an inflatable liferaft	A	Questions to assist the Examiner in assessing the applicant's competence when they have failed to include an item in Column "A"	B
Muster crew and passengers at raft		How do you know everyone assigned to the craft is present	
Ensure everyone knows duties		Where are survival craft assignments and duties listed?	
Ensure every one dressed properly		Describe what people should and should not be wearing or carrying	
Secure painter directly to vessel		Why is a cleat installed in the vicinity of the liferaft station?	
Have strap released that secures raft to cradle		Describe the different methods of releasing a liferaft from its cradle.	
Have raft container carried to launch point		How many crewmembers does it take to safely carry and launch a liferaft?	
Check for obstructions below		What do you check immediately prior to launching the liferaft?	
Have raft thrown into water		What equipment is used to launch the liferaft?	
Have painter pulled out to end		How do you inflate a liferaft?	
Have painter pulled sharply to inflate raft		How long does it take for the liferaft to inflate?	
Have crew and passengers board raft		Describe the different methods of boarding a raft.	
Have crewmember right inverted raft		What do you do in the raft inflates in the inverted position? How do you hold on to the raft while trying to right it?	
Have painter cut to releases		How do you cast off the painter?	
Have raft paddled clear of vessel		How do you propel the raft clear of the vessel?	
Look for, and assist, survivors		What should you do once safely clear of the vessel's side?	
Have sea anchor deployed		What keeps the raft from drifting downwind?	
Ensure liferaft interior has adequate ventilation		Should you seal up all openings to preserve warmth?	
Have double bottom inflated		How do you prevent heat from escaping to the seawater? How do you inflate doublebottom?	
Have all rafts lashed together		What helps searchers spot waterborne survivors from the air?	
Assign watchstanding and other duties		What duties should be assigned to occupants?	

ASSESSMENT GUIDELINE NO. 4 – 15	License Type: <b>TANKERMAN</b> License Group: <b>ANY ENDORSEMENT</b> License Action: <b>RENEWAL</b> License Condition: <b>ANY WATERS</b>	EXAM CODE 40RE	
<b>NUMBER OF MODULES:</b> One (1)	<b>NUMBER OF QUESTIONS</b>	<b>MINIMUM SCORE</b>	<b>SUBJECT MATTER COVERED IN APPROVED COURSES</b>
409XX – Renewal Refresher Exercise (2)(3))	25	90	

Notes:

- (1) After March 31,1996 Tankerman endorsement applicants must complete approved training in accordance with 46 CFR Part 13.
- (2) Applicants for renewal of merchant mariner documents may complete an open book exercise in accordance with 46 CFR 12.02-27. The exercise may be mailed to the applicants or completed by the applicant at the REC where they have access to the exam room reference materials.
- (3) Applicants who fail to achieve the minimum passing score upon initial testing may be retested in accordance with 46 CFR 10.217(a)(2).
